

Predrag Pale has strong interest in applying ICT to education since early 1990-ies. He is experimenting¹⁾ with usage of web, multimedia, computer based assessment and other methods of using ICT in his educational work both at the [University of Zagreb](#) and elsewhere. He regularly speaks²⁾ about the need to rethink education in view of new technologies and globalization.

1)

some insight in his work can be acquired by visiting some of the subjects he teaches:

- [Communication technologies for measurement and control systems](#)
- [Multimedia principles](#)
- [Software design for measurement and control systems](#)

2)

most of his public presentations can be found at his [university home page](#)
