

About this site

In knowledge society **theories of learning and teaching** are **the very foundations** of all activities. The **wealth** of scientific work and results in this field during 20th century **is far from being used**, even **far from being known** to all who practise teaching.

Therefore, **we continuously seek** to find a comprehensive yet intuitive, logical and easy to use **overview of learning (and teaching) theories**. This overview is to serve our own research and educational practice as well as to be an easy to use tool for other practitioners. In this process we decided to share our findings with others. These pages are the result. Below you can find [other similar resources](#) we found to be usefull.

If you would like to contribute to these pages **or collaborate** with us in a broader sense, **we would like to hear** from you.

Please do not hesitate to send us your comments, suggestions or critique to [Juraj Petrović](#) or [Predrag Pale](#)

A note

The text in these pages is written by us. However, it is very hard to avoid wordings, constructs or even whole sentences which are consistently repeated in literature, or are perfectly phrased by some other author. Whereever practical, we took care to include references to other authors. If we failed to do so in a place or two, it was not by intention to appropriate someones intellectual property, and please do draw out attention to this fact.
