

# What is Learning

## Definitions of Learning

There are numerous definitions of learning depending on one's point of view. Some of the definitions we found useful are listed here.

Learning is:

- “acquiring new or modifying existing knowledge, behaviors, skills, values, or preferences and may involve synthesizing different types of information.”<sup>1)</sup>
- the acquisition of knowledge by study.
- “all relatively permanent changes in potential for behavior that result from experience but are not due to fatigue, maturation, drugs, injury, or disease.”<sup>2)</sup>
- “a relatively permanent change in behavior due to experience. This refers to a change in behavior, an external change that we can observe.”<sup>3)</sup>
- “a relatively permanent change in mental associations due to experience. This definition focuses on a change in mental associations, an internal change that we cannot observe.”<sup>4)</sup>
